

# FRAME AUSTRALIA 2010 CONFERENCE

Sofitel Melbourne on Collins  
June 21 & 22, 2010

## *"Housing Construction and Sustainability"*

**Frame Australia is the principal national conference for the structural timber and pre-fabrication industries, and the 2010 conference will provide a unique opportunity for producers and suppliers of timber and wood products, frame & truss fabricators, building designers, specifiers, residential builders and developers to attend for presentations and discussion on the theme "Housing Construction and Sustainability".**

Conference topics will include:

- ❖ *sustainability impact on the timber supply chain from forests to residential builder*
- ❖ *changes occurring in residential housing design and construction*
- ❖ *new Australian Standards for trusses and timber products*
- ❖ *trends and issues for structural timber products*
- ❖ *truss design software international developments*
- ❖ *manufacturing of wall frames and roof trusses*
- ❖ *OHS and productivity improvements*

### **SPONSORSHIP OPPORTUNITIES**

Opportunities for sponsorship are available for companies and organisations with an interest in accessing the conference delegates representing companies in Australia, New Zealand and the Asian-Pacific region.

A major feature is the sponsor exhibition display area, where delegates interact throughout the two day event with conference sponsors on their products and services.

For details and further information on levels of sponsorship  
visit the Frame Australia website
